WORKING AT HEIGHT

SLS
SAFETY LOCK SYSTEM

**Eliminate
the risks of
falling tools**

Every year, falling tools generate thousands of accidents impacting health and productivity. Using solutions adapted specifically to work at height eliminates the risks, avoids loss of time and improves productivity. The nuclear sector uses the term FME (Foreign Material Exclusion) to designate solutions for this type of risk.

WORKING AT HEIGHT

Eliminate the risks of falling tools

+ safety

When a tool falls, it may injure someone. Such an accident can not only be severe for the person hit, but can also have severe consequences for the company.

+ save time

When a tool falls, it must be recovered or sought. Climb down from the work place, get the tool, have to reach for it in confined spaces... All that takes time, which can cause a delay in your activity.

+ savings

When a tool falls, it can damage an expensive facility or equipment, disturb or stop a production process, even slide into an inaccessible location and require replacement.

FLUO

RFid

SAFETY LOCK SYSTEM

FACOM's solution when working at height

From the very beginning FACOM has worked in close cooperation with companies in various sectors to develop tooling perfectly suited to user needs.

FACOM's Safety Lock System (SLS) solution is for all of you who regularly work at height, whether the equipment to be assembled is at a few meters or tens of meters from the ground.

Ruggedness and reliability

The FACOM ring system is made of metal to withstand extreme shocks, solicitations and temperatures. These rings were designed and tested by FACOM. They are sized to withstand at least twice the tool's weight. The tool-ring set is also tested in a real situation with a test of 400 falls per type of tool. FACOM assembles the rings in its plants with controlled pressure guaranteeing perfect crimping.

SAFETY LOCK SYSTEM

FACOM's solution when working at height

Traceability

Each tool goes through an individual traction test when the ring is assembled. A checking certificate is printed and a unique serial number engraved on the tool. FACOM traces its production to guarantee maximum safety. The unique serial number is also used to identify and follow your tool throughout its lifetime.

Ergonomics

The tools in the SLS range were designed specifically by FACOM to preserve the comfort and performance levels of its standard tools in all conditions.

The SLS slides from one side to the other of the wrench handle to allow optimum use of the wrench's open end and ring.

The ratchet handles are fitted with a shackle allowing easy snap ring attachment and freedom of movement.

The SLS ring allows screwdriver rotation without entangling the lanyard.

The SLS ring passes through the metal part of the plier grips to guarantee unequalled strength.

NEW FACOM "SLS HOOK" CONCEPT

**The solution 100% SECURED
against drops!**

1. The tool is attached and secured to your right hand.

2. The double hook unlocks a support only when locked to another support.

3. The tool is transferred and secured to your left hand.

NEW FACOM "SLS HOOK" CONCEPT

The SLS HOOK double hook unlocks a support only when connected to another support.

EASY TO USE

- Easy and immediate handling.
- Transfer from one hand to the other; from hand to belt, from one operator to another, etc.

COMFORT

- You can hold the tool during the transfer. Automatic system = no button to press.
- The tool fastened to the wrist ensures a high freedom of movement.

- You will find the wrist bracelet and bag of the FACOM "SLS HOOK" range in the following pages.

FLUO

RFid

SLS HOOK

Double SLS HOOK

- SLS HOOK hook securing tools against falling:
 - 100% reliable solution during tool transfers.
 - The SLS HOOK double hook locks onto its SLS HOOK holder only upon connection with another SLS HOOK holder.
 - The tool remains connected during the entire transfer operation.
- A tool fitted with the SLS HOOK double hook is transferred from one hand to the other or from one operator to another without any risk of falling.
- Unlike a tool fastened to the belt with a lanyard, the SLS HOOK system is fastened to the user's wrist and reduces the falling height when the tool slips from the hand.
- Comfortable:
 - Passing from one SLS HOOK holder to another is easy and fast.
 - Using the SLS HOOK system (hook + holder) is highly intuitive. Getting acquainted is instant.
 - The SLS HOOK double hook fastened to the wrist ensures a high freedom of movement.
- The SLS HOOK double hook is compatible with the wrist bracelet WRT-SHSLS or the belt bag SH-BAG1SLS. The SLS HOOK holder SH-SUPSLS is also available per unit. It can be fastened to your own equipment: belt, backpack strap.
- Resistance:
 - The SLS HOOK double hook withstands the most extreme conditions in your profession:
 - Aluminium body combining light weight, resistance to shocks, most common solvents and temperature differences.
 - Glass fibre reinforced polypropylene mechanism and stainless steel spring for high resistance and durability.
- SLS HOOK double hook alone: length: 62 mm; width: 39 mm; thickness: 12.5 mm.
- String: length: 158 mm; diameter: 3 mm.
- Stainless steel screw snap hook: length 50 mm; diameter 5 mm.
- Acceptable nominal load: 2.7 kg.

SLS ACCESSORIES

SLS
SAFETY LOCK SYSTEM

The Safety Lock System ring, fastened to the tool, is 100% compatible with the lanyards and accessories of the FACOM SLS range.

FACOM SLS lanyards and accessories are in the orange colour, generally used for safety tools to ensure high visibility.

FACOM supplies its lanyards and accessories with safety screw snap hooks as standard. Automatic closing of the snap hook and screw provide double safety to the snap hook.

FACOM also offer snap hooks without safety screw.

They are easier to handle, particularly with gloves, but do reduce the safety level slightly. Your choice must depend on your applications.

For all its SLS lanyards and belt accessories, FACOM uses stainless steel snap hooks.

They guarantee excellent traction strength, but also extreme outside conditions: outside works, in humid or salty environment.

The FACOM SLS belt, belt accessories and lanyards are tested in extreme conditions of use to guarantee high strength.

SLS lanyards are elastic to reduce their length, hence favouring comfort of use.

The elastic also softens any tool fall.

SLS - STRAPS

■ 20 cm strap - 60 mm stainless steel dual snap hooks with screw - SLS

- Strap connecting tools of the FACOM SLS range to the belt.
- Fitted with 2 60mm stainless steel locking snap hooks with screw.
- Strap particularly suited to securing offset ring wrenches series 54A to the manoeuvring handle 54.M. Also used to fasten tools to the belt.
- Acceptable rated load: 4 kg.

Icon	Width l [mm]	L [mm]	ΔΔ [g]
LAN0.2	13	200	70

■ 1.2 m strap - 80 mm stainless steel dual snap hooks with screw - SLS

- Strap connecting tools of the FACOM SLS range to the belt.
- Fitted with 2 80mm stainless steel locking snap hooks with screw.
- Strap particularly suited to securing heavy tools to the belt or external holders (ladder, scaffold, elevator platform). Strap providing optimum securing of heavy tools.
- Length of lanyard stretched without snap hook: 1.20 m.
- Acceptable rated load: 6 kg.

Icon	L [mm]	L [mm]	ΔΔ [g]
LAN1.2	1200	1200	110

■ Lanyard 1.2 m steel cable - 80 mm stainless steel double snap hook with screw - SLS

- Lanyard for connecting tools of the FACOM SLS range to the belt or equipment (ladder, scaffolding, platform).
- Fitted with 2 80 mm stainless steel snap hooks with locking screw.
- Reduced footprint of the steel cable.
- Steel cable coated with plastic sheath very easy to clean and/or decontaminate. The plastic sheath preserves the environment you work in.
- Cable diameter: 3.5 mm (4.8 mm with the plastic sheath).
- Nominal acceptable load: 4.5 kg.

Icon	L [mm]	ΔΔ [g]
LAN1.2MSLS	1200	220

■ 1.2 m strap - Wrist loop and 80 mm stainless steel snap hook with screw - SLS

- Fitted with an 80mm stainless steel snap hook with locking screw.
- Strap particularly suited to securing light tools to the wrist. Strap ensuring high movement mobility.
- Strap extended length excluding snap hook: 1.20 m.
- Acceptable rated load: 6 kg.

SLS - BELTS

■ Belt with dual point metal loop - SLS

- Belt to fasten tools of the FACOM SLS range.
- Dual point metal loop: both points must be pressed to release the loop to prevent accidental opening and ensure optimum safety.
- Supplied with comfort foam pad with velcro for optimum adjustment.
- Belt compatible with the accessories of the FACOM SLS range: CT-ACC2M (D metal with 2 60 mm stainless steel snap hooks with locking screw) and CT-ACC (D metal only).
- 8 50 mm slots for CT-ACC2M or CT-ACC accessories.
- Height of the accessory storage strap: 45 mm.
- Waist size:
 - CT70-100 : 70-100 cm.
 - CT100-140 : 100-140 cm.

	ΔΔ [g]
CT70-100	390
CT100-140	410

RETRACTABLE LANYARDS BAG

The retractable lanyards are stored automatically in their housings.

They do not remain around the belt and will not entangle unlike a traditional lanyard.

The lanyards connect the tools to your belt. Wrists remain free: "hands-free work".

SLS
SAFETY LOCK SYSTEM

SLS - BELT ACCESSORIES

■ Bag fitted with 2 retractable lanyards

- Bag fitted with 2 retractable lanyards (lanyard extended to maximum: 105 cm).
- The retractable lanyards connect the tools to your belt. The tools are not connected to your wrists: "hands free" work.
- The retractable lanyards are stored automatically in their housings. Conversely, a traditional lanyard remains around the waist and may be entangled.
- Using a snap hook MOUSQ6X60SLS is recommended to connect a FACOM SLS tool to the retractable lanyard ring.
- Fabric resistant to most common solvents.
- Compatible with FACOM belts SLS CT70-100 (70 to 100 cm) and CT100-140 (100 to 140 cm).
- Loop height: for 55 mm strap max.
- Loop thickness: for strap of 3 mm max.
- Snap hook MOUSQ6X60SLS and tools not included.
- Nominal acceptable load: 0.7 kg.

	H [mm]	Width l [mm]	ΔV [g]
BAG-RECT2SLS	285	105	190

■ Bag for carrying spare parts

- Bag particularly suited to carrying spare parts
- Automatic closing: the bag is automatically closed by spring blades when you remove your hand.
- Totally sealed bag with a zip lock. Strap attached to the closing for easier handling when wearing gloves.
- Fabric resistant to most common solvents.
- Compatible with FACOM belts SLS CT70-100 (70 to 100 cm) and CT100-140 (100 to 140 cm).
- Maximum opening diameter: 110 mm.
- Tools not included.
- Nominal acceptable load: 5.4 kg.

SLS - HEAT-SHRINKING SHEATHS

HEAT SHRINKING SHEATHS WITH ATTACHMENT RING

6 heat-shrinking sheaths from 6.5 to 89 mm can be used to attach a ring and attach your products:

- attaching a tool not from the Facom SLS range
- attaching one of your special tools
- last minute emergency on a worksite: use the heat-shrinking sheaths to convert your tools.

Easy and fast fitting

Position and heat the sheath. About 3 minutes per tool.

Heat shrinking sheath with integrated glue

Adheres on many materials: steel, aluminium, plastic, wood.

SLS.G - Heat Shrink Sheath with metal "D" ring

- Shrink tubing fitted with a strap and a metal "D" ring - SLS. This solution allows you to add an attachment point to all types of products and make them compatible with lanyards and carabiners from the facom SLS range. Examples: special tools, pens, sprays etc.
- The strap surrounds the shrink tubing for strength and maximum security for all.
- Fabric resistant to common solvents.
- Sheath equipped with an adhesive which becomes liquid with the heat during the retraction of the sheath. optimum temperature of withdrawal: between 150 and 300 ° depending on the thickness and diameter of the sheath.
- Excellent adhesion on most substrates: crude steel, chrome or phosphate, aluminum, wood, plastic, ...

Precautions:

- Clean and degrease the product that will receive the shrink tubing.
- Select the correct diameter of shrink-hose according to the allocation table.
- Identify a location where the sheath will not harm ergonomics. If possible, choose a location where the sheath can not escape once retracted.
- Respect the maximum weight recommended.
- Heat the sheath about 3cm away with a standard heat gun Facom E.2015. Be careful not to burn the strap.
- Allow to cool for 5 minutes to obtain optimum adhesion of the glue.
- Check the bond.
- Check the equipment periodically.

SLS - WRENCHES

THE SLS TOOL RANGE

FACOM has designed a new range of Safety Lock System tools suited specifically to work at heights to eliminate the risks of accidents due to falling tools, avoid time loss and improve productivity.

Falling tools can be very severe for the person impacted and also have heavy consequences for the company. When a tool falls, it must be recovered, which induces a loss of time.

Falling tools can damage an expensive facility, cause the tool to be lost or production to be disturbed. These cases have financial repercussions.

Resistance and ergonomics of use

- FACOM has designed a special ring system for its tools in the SLS range. The ring's metal was chosen to guarantee an unbeatably strong design: a safety-related tool cannot be faulty.
- The steel cable is embedded in the metal to guarantee a very robust "ring/cable" connection. In extreme breakage situations, the cable breaks before the connection.
- The cable is crimped with a controlled pressure to ensure perfect connection.
- In addition, each tool is checked individually using a traction machine. An individual certificate is issued and a unique serial number engraved on the tool. FACOM ensures traceability of its production, and you can also follow up your tooling during its use.
- The cable is flexible, which preserves optimum use of the tool in terms of comfort and ergonomics.

The SLS ring system slides from one side of the wrench to the other to allow optimum use.

The SLS ring system, associated with a ring fastened on the blade, allows screwdriver rotation without entangling the lanyard.

Ratchet and torque wrench handles are fitted with a shackle allowing easy snap ring attachment and freedom of movement.

The SLS ring system passes through the metal part of the plier grips to guarantee unequalled strength.

440.SLS - Metric combination wrenches

NF ISO 691, NF ISO 7738, NF ISO 3318, NF ISO 1711-1, E74-306, ISO 691, ISO 7738, ISO 3318, ISO 1711-1, DIN ISO 691, DIN 1711-1, DIN 3113, ASME B107.100

- Tool equipped with a FACOM SLS attachment solution, preventing any risk of accidental falls.
- The crimped "sliding" cable solution, selected and tested by FACOM, maintains user ergonomics (8 - 30 mm wrenches).
- Standard wrench for all current applications.
- High mechanical strength combined with compact size meeting aeronautical standards.
- Ring head:
 - Ring open end (size E) designed for better access to series or embedded screws.
 - OGV® profile with 12-point ring for powerful tightening while protecting the nut.
 - Ring head angled at 15°.
- Open end head:
 - Open end angled at 15°.
 - Open end head-handle geometry optimised for increased access.
- Metric sizes: 6 to 34 mm.
- Presentation: satin chrome finish.

■ **467S.SLS - Short metric ratchet combination wrenches**

- Tool equipped with a FACOM SLS attachment solution, preventing any risk of accidental falls.
- The crimped "sliding" cable solution, selected and tested by FACOM, maintains user ergonomics (8 - 30 mm wrenches).
- Extra-short handle ratchet combination wrenches: ideal in inaccessible areas.
- Compact ratchet mechanism and reversible by lever.
- Increment 5° (6° for dimension 7, 8 and 9 mm).
- Ring head angled at 15°.
- Open end head angled at 15°.
- Metric sizes: 7 to 17 mm.
- Presentation: satin chrome finish.

SLS - WRENCHES

44S.SLS - Metric open end wrenches

- Tool equipped with a FACOM SLS attachment solution, preventing any risk of accidental falls.
- The crimped "sliding" cable solution, selected and tested by FACOM, maintains user ergonomics (8 - 30 mm wrenches).
- The open ends are slimmer than a standard combination wrench for better accessibility. Examples: brake calipers, hydraulic hose locknuts.
- Heads hinged at 15°.
- Metric sizes: 6 to 41 mm.
- Presentation: satin chrome finish.

113A.C - Chromed adjustable wrenches

NF ISO 6787, ISO 6787, DIN 3117, ASME B107.100

- Tool equipped with a FACOM SLS attachment solution, preventing any risk of accidental falls.
- Good access to the button = easy setting.
- Non-protruding moving jaw at maximum capacity.
- Pre-adjustment of jaw opening thanks to millimetric gradation.
- Right-hand button rotation.
- Range from 4" to 24".
- Presentation: chromed body and polished head faces.
- Adjustable wrenches with hole in the handle: direct hooking by carabiner.

SLS - RATCHET

1/4" maintenance free pear head ratchet - SLS

NF ISO 3315, ISO 3315, DIN 3122, ASME B107.110

- Tool equipped with a FACOM SLS attachment solution, preventing any risk of accidental falls.
- FACOM has adopted the shackle solution for particularly heavy and/or large tools.
- Very long lifetime in all working conditions. Dust proof, maintenance free mechanism.
- 72 teeth mechanism for 5° increments.
- Socket safety lock: no more sockets falling into machines.
- Drive direction switch allows easy reversal even with gloved or greasy hands.
- Palm control system - allows the operator to press down on the head avoiding risk of accidental reverse.
- Ultra-compact head.
- Bimaterial elastomer handle: high resistance to abrasion and the most severe workshop solvents: SP95, SP98, diesel fuel, acetone, brake fluid, Skydrol, Jet Oil, jet fuel.

SLS - TORQUE CONTROL

■ 306D.SLS - Click wrenches without accessories

NF EN ISO 6789, ISO 6789, DIN EN ISO 6789

- Tool equipped with a FACOM SLS attachment solution, preventing any risk of accidental falls.
- FACOM has adopted the shackle solution for particularly heavy and/or large tools (32 - 41 mm wrenches).
- Factory accuracy: ± 2% except: R.306-25DSLS.
- Reliability of mechanism: 50 000 cycles (wrenches up to 200 N.m).
- Use possible with accessories:
 - End fitting: 9 x 12 or 14 x 18 mm.
 - Diameter: 30 mm.
- One-way wrenches usable for unscrewing by reversing the bits.
- Numbered wrenches supplied with ISO 6789 calibration certificate.
- Supplied in plastic box.

▪ Half-soft triangular file with grip - SLS

- Tool fitted with a FACOM SLS attachment solution, preventing any risk of accidental falls.
- The "turning" crimped cable solution, chosen and tested by FACOM, preserves the ergonomics of use of the tool.
- The plastic grip is glued and non-removable to prevent any risk of fall or loss.
- Triangular file with handle.
- Double square on 3 cuts.
- Presentation: ergonomic handle in plastic resistant to the most aggressive workshop solvents.
- Recommended for common work on steel, cast iron, brass, and hard plastics.

Multifunction trigger sheath-stripper - SLS

- Tool fitted with a FACOM SLS attachment solution, preventing any risk of accidental falls.
- The "turning" crimped cable solution, chosen and tested by FACOM, preserves the ergonomics of use of the tool.
- Trigger system: 30% less effort.
- Auto-swivel blade: fast and easy sheath removal.
- Double safety:
 - Cutting blade out = trigger locked.
 - Lock back blade.
- Capacity: round PVC cable diameter 4 to 28 mm.
- Stripping zone.

NEW RANGE OF FLUORESCENT TOOLS

Your solution for "black or dark zones"

Detect the tool thanks to its fluorescence, activated by a lamp or UV neon light. Detectable in black or dark environment up to 5 metres.

SAFETY

- Effective colour code for detection even in broad daylight
- Higher visibility on the tool, particularly in dark areas: no risks of accidents, injury, incidents, etc.
- No chipping or scaling due to a fall or shock, no loss of elements or accessory from the product.

FLUO

ERGONOMICS

- No larger than standard tools.
- Good product grip.

IMPROVED PRODUCTIVITY

- Tools compatible with rolling cabinet storage modules.
- No time wasted searching for lost tools.
- Easy cleaning.

COST REDUCTIONS

- No lost tools to be replaced.
- Lifetime identical to a standard tool.

A comprehensive range of products meeting the most common applications: wrenches, ratchets, sockets, gauges, pliers, hammers, rules, etc.

SETS FLUO

FIXED AND VARIABLE OPENING WRENCHES

COMBINATION WRENCHES FLUO

■ 440F - Metric combination wrenches - FLUO

NF ISO 1711-1, NF ISO 691, ISO 1711-1, ISO 691, DIN ISO 1711-1, DIN ISO 691

- Detect the tool thanks to its fluorescence, activated by a lamp or UV neon light. Detectable in black or dark environment up to 5 meters.
- Standard wrench for all current applications.
- High mechanical strength combined with compact size meeting aeronautical standards.
- Ring head:
 - Ring open end (size E) designed for better access to series or embedded screws.
 - OGV® profile with 12-point ring for powerful tightening while protecting the nut, H suffix = 6-point ring.
 - Ring head angled at 15°.
- Open end head:
 - Open end angled at 15°.
 - Open end head-handle geometry optimised for increased access.
- Metric sizes: 4 to 19 mm.
- Presentation: satin chrome finish.

RATCHET WRENCHES FLUO

64F - Inch straight ratchet ring wrenches - FLUO

ASME B107.100

- Detect the tool thanks to its fluorescence, activated by a lamp or UV neon light. Detectable in black or dark environment up to 5 meters.
- Straight ratchet ring wrenches: to reach the nut flat.
- Compact ratchet mechanism and reversible by flipping the wrench.
- Increment 5° (7.5° for dimension 1/4" mm; 6° for dimensions 5/16" and 11/32").
- Dimensions in inches: from 1/4" to 5"16.
- Presentation: satin chrome finish.

NF ISO 1711-1, NF ISO 691, ISO 1711-1, ISO 691, DIN ISO 1711-1, DIN ISO 691, ASME B107.100

- Detect the tool thanks to its fluorescence, activated by a lamp or UV neon light. Detectable in black or dark environment up to 5 meters.
- 15° hinged ratchet ring wrenches: ring offset to clear fingers or obstacles.
- Compact ratchet mechanism and reversible by lever.
- Increment 5° (7.5° for dimension 6 mm; 6° for dimensions 7, 8 and 9 mm).
- Ring head angled at 15°.
- Metric sizes: 6 to 24 mm.
- Presentation: satin chrome finish.

OPEN END WRENCHES FLUO

34F - Inch 15° and 75° hinged "midget" open end wrenches - FLUO

ASME B107.100, SAE AS954G

- Detect the tool thanks to its fluorescence, activated by a lamp or UV neon light. Detectable in black or dark environment up to 5 meters.
- "Midget" open end wrenches: short shank and slim heads for manoeuvrability in confined spaces.
- Heads hinged at 15° and 75° allow to intervene on nuts inaccessible with a standard wrench.
- Dimensions in inches: from 3/16" to 11/16".
- Presentation: satin chrome finish.

SOCKET WRENCHES FLUO

74AF - Forged socket wrenches with metric screwdriver handle - FLUO

NF ISO 2236, NF ISO 691, ISO 2236, ISO 691, DIN 3125, DIN ISO 691

- Detect the tool thanks to its fluorescence, activated by a lamp or UV neon light. Detectable in black or dark environment up to 5 meters.
- Socket wrenches with screwdriver handle ideal for screws with limited access in height or precision mechanics.
- Protwist screwdriver handle for optimum comfort even for powerful unlocking.
- 6-point socket with deep opening for long threads.
- Forged body for maximum strength.
- Metric sizes: 3.2 to 14 mm.
- Presentation: satin chrome finish.

RATCHETS 1/4" FLUO

1/4" Hi-Lok® ratchet - FLUO

ISO 3315

- Detect the tool thanks to its fluorescence, activated by a lamp or UV neon light. Detectable in black or dark environment up to 5 meters.
- Specific ratchet for use on Hi-Lok®, Hi-Lite® or Hi-Tigue® rivets.
- The sockets are locked onto square drive by a metal clip.
- Hole in the ratchet head to insert a key to lock the fastener during the tightening phase.
- Highly compact head for better accessibility.
- 1/4" square drive bit.
- 72 tooth mechanism for 5° increments.
- Detect the tool thanks to its fluorescence, activated by a lamp or UV neon light. Detectable in black or dark environment up to 5 metres.

1/4" maintenance free pear head locking ratchet - FLUO

NF ISO 3315, ISO 3315, DIN 3122, ASME B107.10

- Detect the tool thanks to its fluorescence, activated by a lamp or UV neon light. Detectable in black or dark environment up to 5 meters.
- Socket locking and quick release system.
- Dust proof, maintenance free mechanism.
- 72 teeth mechanism for 5° increments.
- Drive direction switch allows easy reversal even with gloved or greasy hands.
- Palm control system - allows the operator to press down on the head avoiding risk of accidental reverse
- Ultra-compact head.
- Hook for hanging when working at height.
- Ergonomic comfort grip handle design resistant to workshop chemicals and solvents.

RL171F	d [mm]	d1 [mm]	H [mm]	L [mm]	L1 [mm]	ΔΔ [g]

1/4" fast ratchet with rotating handle - FLUO

- Detect the tool thanks to its fluorescence, activated by a lamp or UV neon light. Detectable in black or dark environment up to 5 meters.
- Rotating handle mechanism: work twice faster in confined spaces.
- 60 tooth mechanism for 6° increments upon final tightening.
- Socket safety locking: no sockets lost in your machines.
- Reversing by rotating cap.
- "Palm control" system, allowing to press the ratchet head during (un)tightening without risk of accidental reversing of the rotation direction.
- Bi-material elastomer grip: high resistance to abrasion and the most severe workshop solvents: SP95, SP98, diesel fuel, acetone, brake fluid, Skydrol, Jet Oil, kerosene.

Bit-holder ratchet wrench 1/4" - 5/16" - FLUO

- Detect the tool thanks to its fluorescence, activated by a lamp or UV neon light. Detectable in black or dark environment up to 5 meters.
- Takes the following bits:
 - Series 1: hexagon 1/4".
 - Series 2: hexagon 5/16".
- Used for installing 1/4" and 5/16" aircraft fasteners.
- Increment: 5°.
- Heads angled at 15°.
- Bits held by a spring clip.
- Knurled head for fast pre-tightening.
- Length 150 mm.
- Satin chrome finish.

PROTWIST® SCREWDRIVER FLUO

■ ANXRF - PROTWIST® screwdrivers for Resistorx® screws - FLUO

■ AP.VEF - PROTWIST® 1000 Volt insulated screwdrivers for Phillips® head screws - FLUO

- Detect the tool thanks to its fluorescence, activated by a lamp or UV neon light. Detectable in black or dark environment up to 5 meters.
- Compliant with Resistorx® specifications.
- Silicon carbon blade: strong and resistant to flexion.
- Bi-material grip resists to impacts, abrasion, and chemicals.
- Finish: black tipped mat chromed blade.

NF ISO 8764-1, NF ISO 8764-2, NF EN 60900, ISO 8764-1, ISO 8764-2, EN 60900, DIN ISO 8764-1, DIN ISO 8764-2, DIN EN 60900, ASME B107.600

- Detect the tool thanks to its fluorescence, activated by a lamp or UV neon light. Detectable in black or dark environment up to 5 meters.
- For your safety, each screwdriver is tested individually at 10000 Volts for 10 seconds, at the end of the manufacturing cycle.
- 1000 Volt sheathed round blade.
- Bi-material grip resists to impacts, abrasion, and chemicals.

"CONNECTOR" PLIERS FLUO

■ "Connector" pliers - FLUO

ASME B107.500

- Fluorescent tool, detectable by ultraviolet light. Detectable in dark and dimly lit areas for 5 meters.
- For handling fragile round components, e.g. screwed connector sleeves, tubes, lamps or wire looms, etc.
- Wide capacity from 3-position slip joint: max. diameter 55 mm.
- Replaceable plastic jaws available in 2 jaw hardness options:
 - 410.SF: soft jaws - 55 shore B.
- Finish: polished chrome, red PVC grips.
- Spare jaws:
 - 410.SF: Set of 2 jaws with screws (soft).

RULES - GAUGES FLUO

Round tip metric thickness gauges - FLUO

- Fluorescent tool, detectable by ultraviolet light. Detectable in dark and dimly lit areas for 5 meters.
- Set of 19 feeler gauges (round tip): 4/100 --> 100/100 mm.
- Blade length: 90 mm.

Code	Weight [g]
804F	60

Long metric thickness gauges - FLUO

- Fluorescent tool, detectable by ultraviolet light. Detectable in dark and dimly lit areas for 5 meters.
- Set of 19 feeler gauges (round tip): 4/100 --> 25/100 mm.
- Blade length: 150 mm.

Code	Weight [g]
804.LF	95

DELA.1051 - Stainless steel rules - 2 sides - FLUO

- Fluorescent tool, detectable by ultraviolet light. Detectable in dark and dimly lit areas for 5 meters.
- Engraved on both sides.
- One edge in mm - One edge in 1/2 mm.
- Stainless steel 18 % Cr - 8 % Ni.
- Anti-reflection treatment.
- Class II as per regulations applies to rules with a length above or equal to 500 mm.

Code	L [mm]	Weight [g]
DELA.1051.02F	150	10,9
DELA.1051.03F	200	13

MAKING-OUT FLUO

Steel scriber - FLUO

NF E 71-016, NF ISO 15601, ISO 15601

- Fluorescent tool, detectable by ultraviolet light. Detectable in dark and dimly lit areas for 5 meters.
- Tip treated in chrome vanadium steel.
- Tip: Ø 4 mm.

Code	L [mm]	Weight [g]

FLUORESCENT TOOLING

SCISSORS - INSPECTION MIRRORS

Electricians scissors - FLUO

- Fluorescent tool, detectable by ultraviolet light. Detectable in dark and dimly lit areas for 5 meters.
- 100% metal handles, left/right hand.
- Short reinforced blades, with wire cutter.
- Finish: polished chromed.

ED	L [mm]	ΔΔ [g]
841F	150	95

SCISSORS - INSPECTION MIRRORS

■ Inspection mirror - FLUO

- Fluorescent tool, detectable by ultraviolet light. Detectable in dark and dimly lit areas for 5 meters.
- Mirror in scratch resistant glass, available as spare parts.
- Metallic strapping around the glass for better protection.
- Join easily adjustable, or even locked, by screw.
- Solvent resistant plastic handle: Skydroll, gasoil...
- Max length 850 mm.
- Mirror diameter 55 mm.

RFID

ADVANCED FOD SOLUTIONS FOR CUTTING EDGE SECTORS

The RFID technology (Radio Frequency Identification) allows remote identification of a tool by means of the electronic chip it encapsulates. The latter uses energy the radio transmitter signal propagates at a short distance: no battery required. Invisible and sturdy, RFID chips guarantee optimum operation for many years. The radio technology used has no impact on the outside environment.

ADVANCED FOD SOLUTIONS FOR HIGH-TECH SECTORS

MULTIPLE BENEFITS IN THE WORKSHOP

- HIGH QUALITY CHIPS Programmed to guarantee the best detection.
- Tool traceability ensured in the workshop by zones of use.
- Fluorescent tools spotted up to 3 metres away in dark areas.
- Broad range covering all applications.

CHIP PERFECTLY INTEGRATED TO THE TOOL

Whatever the tool, FACOM engineers have chosen the RFID chip integration guaranteeing the most effective data transmission possible. Encapsulated under a shock-proof shell, the chip is protected durably, even against chemicals, without altering the basic specifications or ergonomics of the tool.

FLUO

RFID

RFID DETECTION BAG

The most advanced solution to tool control

RFid
TECHNOLOGY
BY FACOM

OPTIMUM SAFETY

IMPROVED PRODUCTIVITY

MOBILITY

- Independent mobile container.
- Capacity 50 tools.
- Runs with FACOM RFID and other tagged tools.

ON-BOARD ELECTRONICS

- Accelerometer, rfid antennas and scanner inside the bag.

BUILT-IN SCREEN

- Easy identification of problems detected.

100% SEALED

- Its shielding guarantees 100% detection = does not detect tools outside the bag.
- Patented.

RECHARGEABLE BATTERY

- Dewalt 7.2v Lithium ion battery.
- Min lifetime 2 days.
- Easily inserted and removed.

INTUITIVE

- Easy-to-use keypad.
- Visual and sound warnings.

SOFTWARE

- Easy database management.

AUTOMATIC INVENTORY

- No manual intervention.
- A scan is launched at each movement.
- Patented.

ROLLER BAG

- No impact on the work space.
- Wheels, handle and strap to follow you everywhere.
- With padlock clasp.

RFID STORAGE

RFID tool bag - Detection bag

- Standalone bag carrying tools with RFID chips ensuring tool traceability in the workspace by automatic set scanning.
- The most advanced solution for tracking your tools in sensitive areas.
- Scanning is triggered automatically when the bag is opened or closed and moved: no more tools forgotten in your work space.
- After each action, a light and sound signal informs the user, in addition to the message on the back-lit screen.
- 3 carrying solutions: wheels and telescopic handle, leather coated aluminum handle, strap with shoulder reinforcement pad.
- Strong 1200-denier fabric.
- Wheel diameter: 90 mm.
- Useful capacity: 50 tools; Max weight: 23 kg.
- Internal dimensions (LxDxH): 33 x 17 x 19.5 cm.
- External dimensions (LxDxH): 55 x 36 x 44 cm.

RFID HINGED RATCHET COMBINATION WRENCH SERIES

467F - Metric hinged jointed combination wrenches - RFID

NF ISO 1711-1, NF ISO 691, ISO 1711-1, ISO 691, DIN ISO 1711-1, DIN ISO 691

- Tool with built-in RFID chip for workshop traceability.
- Chip integration by Facom guarantees maximum detection and strength, while preserving the tool's ergonomics.
- Radio frequency identification requires appropriate storage equipment.
- Straight ratchet ring wrenches: to reach the nut flat.
- Compact ratchet mechanism and reversible by flipping the wrench.
- Increment 5° (7.5° for dimension 6 mm; 6° for dimensions 7, 8 and 9 mm).
- Metric sizes: 8 to 19 mm.
- Presentation: satin chrome finish.

467F - Inch hinged jointed combination wrenches - RFID

ASME B107.100

- Tool with built-in RFID chip for workshop traceability.
- Chip integration by Facom guarantees maximum detection and strength, while preserving the tool's ergonomics.
- Radio frequency identification requires appropriate storage equipment.
- Hinged head ratchet combination wrenches: to reach difficult access nuts.
- Compact ratchet mechanism and reversible by flipping the wrench.
- Increment 5° (6° for dimensions 8 and 9 mm).
- Ring head hinged at 180°.
- Open end head angled at 15°.
- Dimensions in inches: from 5/16 to 3/4".
- Presentation: satin chrome finish.

RFID

RFID 1/4" RATCHETS

1/4" maintenance free pear head ratchet - RFID

NF ISO 3315, ISO 3315, DIN 3122, ASME B107.110

- Tool with built-in RFID chip for workshop traceability.
- Chip integration by Facom guarantees maximum detection and strength, while preserving the tool's ergonomics.
- Radio frequency identification requires appropriate storage equipment.
- Dust proof, maintenance free mechanism.
- 72 teeth mechanism for 5° increments.
- Drive direction switch allows easy reversal even with gloved or greasy hands.
- Palm control system - allows the operator to press down on the head avoiding risk of accidental reverse.
- Ultra-compact head.
- Hook for hanging when working at height.
- Ergonomic comfort grip handle design resistant to workshop chemicals and solvents.

	d [mm]	d1 [mm]	H [mm]	L [mm]	L1 [mm]	ΔΔ [g]
RL.171RFID	22	20	25	120	110	90

1/4" fast action twist handle ratchet - RFID

NF ISO 3315, ISO 3315, DIN 3122, ASME B107.110

- Tool with built-in RFID chip for workshop traceability.
- Chip integration by Facom guarantees maximum detection and strength, while preserving the tool's ergonomics.
- Radio frequency identification requires appropriate storage equipment.
- Twist handle for working twice as fast in confined spaces
- 6° increments for final tightening.
- Socket safety locking: no more lost sockets.
- Palm control system - allows the operator to press down on the head avoiding risk of accidental reverse.

PROTWIST® handle screwdriver 1/4" - 158 mm - RFID

NF ISO 3315, ISO 3315, DIN 3122, ASME B107.110

- Tool with built-in RFID chip for workshop traceability.
- Chip integration by Facom guarantees maximum detection and strength, while preserving the tool's ergonomics.
- Radio frequency identification requires appropriate storage equipment.
- Detectable by its fluorescence, activated by a lamp or UV neon light.
- Bi-material grip resists to impacts, abrasion, and chemicals.
- Finish: chromed.

Bit-holder ratchet wrench 1/4" - 5/16" RFID

- Tool with built-in RFID chip for workshop traceability.
- Chip integration by Facom guarantees maximum detection and strength, while preserving the tool's ergonomics.
- Radio frequency identification requires appropriate storage equipment.
- Takes the following bits: - Series 1: hexagon 1/4".
- Series 2: hexagon 5/16".
- Used for installing 1/4" and 5/16" aircraft fasteners.
- Increment: 5°. - Heads angled at 15°. - Bits held by a spring clip.
- Knurled head for fast pre-tightening.
- Length 150 mm.
- Satin chrome finish.

R - 1/4" drive extension - RFID

NF ISO 3316, ISO 3316, DIN 3123, ASME B 107.110

- Tool with built-in RFID chip for workshop traceability.
- Chip integration by Facom guarantees maximum detection and strength, while preserving the tool's ergonomics.
- Radio frequency identification requires appropriate storage equipment.
- Finish: chromed.

R.RC - 1/4" drive locking extensions - RFID

NF ISO 3316, ISO 3316, DIN 3123, ASME B 107.110

- Tool with built-in RFID chip for workshop traceability.
- Chip integration by Facom guarantees maximum detection and strength, while preserving the tool's ergonomics.
- Radio frequency identification requires appropriate storage equipment.
- Locking mechanism.
- Finish: bright chrome.

1/4" universal joint - RFID

NF ISO 3316, ISO 3316, DIN 3123, ASME B 107.110

- Tool with built-in RFID chip for workshop traceability.
- Chip integration by Facom guarantees maximum detection and strength, while preserving the tool's ergonomics.
- Radio frequency identification requires appropriate storage equipment.
- Spring-stiffened joints. Stays in position when reaching for fasteners.
- Finish: bright chrome.
